## EDUCATION

### AKTU

B.TECH IN COMPUTER SCIENCE  
2024 Batch | Ghaziabad  
GPA : 8

### THE SKYLAND SCHOOL

Class 12 , Percentage : 95%  
Class 10 , Percentage : 87.2%

## COURSEWORK

### UNDERGRADUATE

- Algorithm and Design Analysis
- Database Management System
- Object-Oriented Programming
- Operating System
- Computer Networks

## SKILLS

### LANGUAGES

C++ • C • Javascript • NodeJS  
SQL • HTML/CSS • Python • Pyspark

### FRAMEWORKS & DATABASES

ExpressJS • ReactJS • TypeScript  
MongoDB • REST Framework •  
Puppeteer

### TOOLS

Databricks • Git • Github • GitLab • AWS  
EC2  
Postman • Swagger • JIRA  
VS Code • Slack

## POSITION OF

## RESPONSIBILITY

- Senior Student Coordinator in CSI (Computer Society of India). Mentored team on technology best practices.
- Orchestrated and managed a React Workshop
- Coordinated a team of **45** members to develop various **MERN** projects.

## WORK EXPERIENCE

### DEVTOWN | Software Developer

| [Link](#)

NodeJS | AWS | MongoDB | Swagger API | NextJs | Puppeteer  
March 2023 - Aug 2024 | Remote

- Led development of the DevTown Sales portal, integrating **Razorpay & webhooks** to automate revenue calculations and reduce manual effort by **80%**. Supported over **400+** students daily, enhancing payment experience. [link](#)
- Developed dashboards for Admin, Manager, and Business Development roles. Configured cron schedulers for automated task execution, improving operational efficiency. Integrated **New Relic** for performance monitoring.
- Managed AWS deployment and CI/CD pipelines to ensure efficient and reliable deployment processes.

### ENGINEERHUB | Backend Developer

| [Link](#)

NodeJS | ExpressJS | MongoDB | JWT | Amazon Web Services (AWS)  
July 2022 - Jan 2023 | Remote

- Constructed backend for the company website and app from scratch.
- Designed project flow and schema for the Minimum Viable Product (MVP).
- Implemented JWT for stateless authentication.

### DUCKCART | Backend Developer

| [Link](#)

NodeJS | ExpressJS | MongoDB | JWT  
Oct 2022 - Dec 2022 | Remote

- Developed and optimized REST APIs, improving application functionality and user interaction.
- Rectified bugs in existing APIs, resulting in a **50%** reduction in user-reported issues and improved application stability.

## ACHIEVEMENTS

- Solved 350+ data structures and algorithms problems on various coding platforms.
- Earned 100 days of code badge on LeetCode.
- Ranked in Top 10 among 120+ teams in **72hrs HACKATHON 7.0**, UPES. | [LINK](#)
- Contributed to Hacktoberfest 2022 with 5 PRs merged.
- Participated in National Level Hackathon 2022. | [LINK](#)

## PROJECTS

### EXAM PORTAL

| [Link](#)

NodeJS | ReactJS | ExpressJS | MongoDB | JWT

- Developed a software solution for MCQ-based recruitment of 2nd-year students in a technical society, streamlining the selection process.
- Designed separate admin and user interfaces for effective management.
- Implemented multiple APIs for seamless frontend integration.
- **Authentication:** Utilized JWT for authentication.

### AUTH APIS

| [Link](#)

NodeJS | ExpressJS | MongoDB | JWT

- Implemented APIs for login and registration using JWT.
- Added functionalities such as OTP generation for email and mobile verification, and API for password recovery.
